HTCDev™

Unlock Device Bootloader Workflow

1 Use Android SDK to run fastboot command and request the device identifier token

START

3 User submits device ID token via HTCdev.com portal

5 User unlocks device using Unlock Command and Unlock Key

USER'S DEVICE

4 After Validation, server emails the Unlock Key and commands to the user

USER AT PC

KEY GENERATOR
(WEB SERVICE)

2 The identifier token is output to the PC console
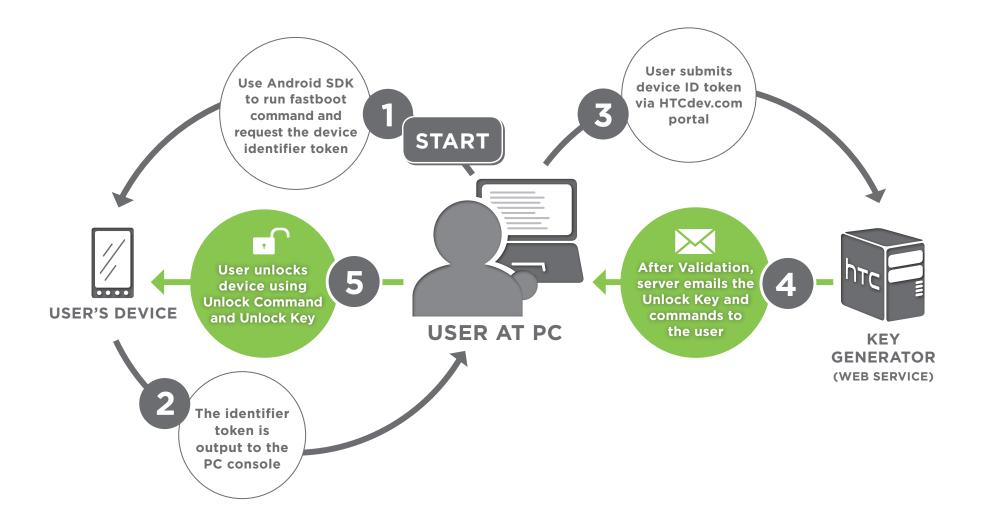

PLEASE NOTE:
We strongly suggest that you do not unlock the bootloader unless you are confident that you understand the risks involved. This is a technical procedure and the side effects could possibly necessitate repairs to your device not covered under warranty.
